ITS EXPRESS

A **HN** HARDENED NETWORKS BRAND

HN-VC-100 Overview

ITS Express/ Hardened Networks products have been specifically engineered to exceed the challenging demands of extreme environmental conditions and high bandwidth 5k multicast video streams.

Whether a media converter or a Full Layer 3 switch, the design incorporates best-in-class chipsets to provide an extremely robust, redundant architecture able to be reliable in any integration.

▶ Steady VDSL2 data link distance up 1.5 miles

▶ 24AWG UTP cable

▶ Supports two wire transmission

▶ DIP switches provided for easy configuration mode for Master (CO)/Slave (CPE)

▶ Supports asymmetric and symmetric bandwidth modes

▶ Redundant 12-48VDC power inputs with terminal block

▶ Ethernet port support of full/half duplex operation

▶ Rigid IP-30 mini-type housing design

▶ Din-rail and wall mounting enabled

VC-100 converts Ethernet to VDLS2 and back to ethernet to extend an ethernet connection over a pair of existing copper cables.

Distance will vary up to 1.5 miles (2400m) over the existing traffic signal interconnect (copper cable) bandwidth will vary depending on the cable type, gauge, cable quality, splices, terminations, and length.

Typical bandwidth will be between 1 MB to 100 MB, depending on factors, including cable separation (interference), moisture intrusion, impedance, cable design, etc.
